 Excellent tactile sensation
 Especially suitable for contact with greasy and oily foods
 Elastic and tear resistant
 Odorless and tasteless
 %100 suitable for food contact
 Silicone and Latex free
 Advantage of lower prices compared with alternative products
 Fast production process and short delivery times

TPE gloves are more smooth, more soft, more tensile and more extensible alternatives to PVC and Nitrile gloves. Apart from this, TPE gloves are economic and environment-friendly products when compared with PVC and Nitrile gloves. Products are similar in the aspects of the production techniques with different raw materials and formulations.

TPE gloves does not consists toxics, they are tasteless and odorless, TPE gloves does not consists carcinogenic plasticizers as PVC. Latex gloves are odorous and may cause allergic reactions after prolonged contacts, an enough reason to select TPE gloves rather than Latex gloves.

New TPE material is a silicone quality product. The main material of the elastomers are natural or synthetic rubber which takes place of plastic. At the same time, it does not consists plasticizers and silicone. In addition to it's elasticity, it is durable and resistant to UV rays.
